White Oak

Tulip Poplar

Black Cherry

Sycamore

Redbud

Tree and Product Descriptions

Norway Spruce (7-14"): Grows to 75 feet. Shiny, dark green 1 in. needles on spreading branches. Spruces are extremely hardy trees that are successful in most conditions. Suited for Christmas tree use and as an ornamental evergreen. They are also great for forming a protective windbreak.

Eastern Red Cedar (5-10"): Grows to 40-60 feet. This is a beautiful evergreen that produces small berry-like cones reddish-brown in color. Excellent for bird habitat in the winter. Grows well in a wide variety of soil types. Branches and bark produce a pleasant aromatic scent.

Concolor (4-8"): Grows to 100 feet. Gray trunk and soft silvery-blue foliage. Flat needles are 1 ½ inches to 2 inches long. Excellent for Christmas tree and ornamental use. They also have a pleasant citrus aroma. Concolors can withstand heat/drought better than other fir trees. Grows best in well-drained soils.

Eastern White Pine (5-10"): Fast growing to 100 feet. A five-needled pine, with soft 4 in. light green-blue needles. Makes an excellent ornamental as well as a Christmas or timber tree. Pines respond well to pruning and grow well in a wide variety of soils.

American Arborvitae (5-10"): Grows to 30 feet. Pyramidal shaped evergreen with average drought and heat resistant characteristics. Prefers moist, and well-drained locations for healthy growth.

Sycamore (8-16"): Grows to 75 feet. Produces leaves 8-15 inches wide. Bark is modeled with gray and white. Prefers wet soils next to stream banks and/or in flood plains. Mature trees provide beneficial wildlife habitat.

Red Bud (8-18"): Grows to 30 feet. Flowers are reddish-purple while budding, opening to a rosy pink with a purplish tint in early spring. Dark green, heart-shaped leaves 3-5 inches long turning yellow in the fall. Seeds and pods are a food source for birds. Can grow in a wide range of soils and in partial to full sun.

Tulip Poplar (15-30"): Grows to 80-120 feet. Produces shiny/dark green leaves 3-6" wide accompanied by vibrant cup-shaped flowers that bloom in early spring. Mature trees produce cone-like fruit light brown in color. Prefers well-drained soils. Leaves will turn a shade of yellow in the fall.

White Oak (4-8"): Grows to 80-100 feet. Produces leaves 4-9" long that turn a dark red/brown in the fall. Mature trees produce acorns beneficial for wildlife habitat. Grows best in moist, well-drained soils in both upland and lowland areas.

Black Cherry (10-20"): Grows to 80 feet. Produces abundant small white flowers and black cherries beneficial for wildlife habitat, can also be made into jelly/jam.

Habitat Enhancers:

Wildflower Seed Mix (Northeast Perennials and Annuals): This wildflower mix consists of 30 different species, containing a 1/3 mix of annuals and a 2/3 mix of perennials of both native and naturalized species that provide color throughout the year. Seed packet coverage = 1 oz./125 sq.ft., 8 oz./1,000 sq.ft. Seeds should be spread in sunny locations.

Butterfly and Hummingbird Seed Mix: This mix produces a diverse variety of annual and perennial flowers, including grasses for cover, that are designed to attract pollinators. Pollinators will benefit from this addition of habitat and will enhance your garden landscape. Seed packet coverage = 1 oz./125 sq.ft, 8 oz./1,000 sq.ft. Seeds should be spread in sunny locations.

Wildlife Food Plot Seed Mix: (NEW) This mix provides nutrition for deer, turkeys, and many upland game birds. Makes a great addition to woodland openings, abandoned fields, or timber harvest areas. Grows well in areas that receive at least four hours of sunlight daily. Seed coverage = 1 pound/871 sq.ft (1/50 acre).

24" Blue-X Tree Shelter: These durable, lightweight shelters give new seedlings needed protection against wildlife while also letting sunlight in for healthy growth.

Tree Shelter Wooden Stake: These wooden stakes accompany the tree shelters by providing support during the first year of seedling growth.

Bluebird Box: These locally hand-built wooden boxes (*built by the West Perry FFA*) feature an over-hanging roof and a recessed bottom with slots for dryness. They also have a swivel front opening for easy cleaning. Attach your box 4-6 feet high on a post facing the nearest tree or shrub, at least 100 yards away from other bird boxes.

BLUEBIRD BOXES

BLUE-X TREE SHELTERS

**ORDER DEADLINE IS
MARCH 31, 2018**

Orders are subject to availability. All seedlings must be purchased by placing a prepaid order. If any one species is sold out, the District will refund payment for those seedlings not available. All seedlings are sold with bare roots and their survival rate varies from site to site, from excellent to poor. We strive to provide the most viable seedlings available, and all efforts are made to handle the seedlings in a manner that minimizes root stress. The Perry Conservation District will not insure successful plantings of bare root seedlings, just as our suppliers will not insure seedling survival. The District is not responsible for orders not picked up by 6P.M. on April 12, 2018.

For more information, please visit our website at www.perrycd.org or call 717-582-5138 or 717-582-8988 ext.4
